

# Energy

15. That DELWP establish a set of indicators, and implement measures to collect appropriate data, to track the impact of energy emissions reduction to meet interim targets set under the Climate Change Act 2017. The reporting should also track the transition of Victoria's grid, transport and industry infrastructure to support a low-carbon future.

## UN SDG targets – 13.2, 13.3

# Energy

16. That DELWP implement measures to collect data and track the impact of the transition to a low-emissions electricity system on

- (i) consumer sentiment and behaviour,
- (ii) investment in distributed, low and zero-emissions electricity generation, and
- (iii) the associated markets, governance and business models.

## UN SDG targets – 7.2, 13.3
