

# Transport

17. That EPA Victoria, in coordination with other Victorian Government agencies, improve transport-related air and noise monitoring, including: developing a real-time noise-monitoring network across Melbourne (with a view to expansion across larger cities in regional Victoria), focusing on monitoring near major transport hotspots that include busy roads, flight paths and along public transport routes, increasing the number of roadside air-monitoring stations and publishing the noise and air data on the internet in real-time.

## UN SDG targets – 3.9 / 9.5 / 11.3, 11.6
